

CUSTOM CYCLE WEAR 2026

# YOUR RIDE MADE BETTER WITH PURPOSE

Kalas began in 1991 as a family-run workshop in the Czech Republic and has grown into a trusted brand worn by champions worldwide.

At Kalas, performance, sustainability and craftsmanship come together under one roof to create cycling apparel that responsibly delivers performance and comfort.

## Sustainability built in

### Local materials. Minimal transport. Lower impact.

We source our technical fabrics from European suppliers located within driving distance of our factory. Our responsible sourcing reduces transport emissions.

### Waste-minimising production

Thanks to state-of-the-art cutting processes, we maximise fabric yield and keep offcuts to a minimum. Any leftover materials are reused or recycled wherever possible.

### Eco-conscious packaging

We've eliminated single-use plastic from our shipments. Your kit arrives in recyclable paper bags, made from certified sustainable forests - better for the planet.

## Everything under one roof

From design to final stitching, each step of the production process happens in-house in the Czech Republic. This gives us full control over quality, working conditions, and carbon footprint.

## Driven by innovation

### In-house R&D, external excellence

Innovation at Kalas goes beyond fabrics. We develop, prototype and test all products internally, working closely with elite riders and performance experts.

### Partnership with Vorteq

Our unique collaboration with advanced technology brand Vorteq has led to the development of the PROJECT collection – garments engineered using wind tunnel testing and patented double-layer fabric technology.

### Validated at the highest level

Our products are trusted by some of the most successful teams and federations in the world. UCI WorldTeam Alpecin–Deceuninck, KNWU (Royal Dutch Cycling Federation) and the Czech National Team achieve their top-level results wearing Kalas kit. Every product is tested and proven in real race conditions before it reaches your team.

# News 2026

**At Kalas, we are committed to continuously evolving our products to deliver the best possible cycling experience. We've spent the past year refining materials, construction, and design details to ensure every rider can benefit from improved performance and comfort.**

**Here's a glimpse of what's new:**

## Extended Sizing for Custom Products

To offer more options across a wider range of body shapes, all new custom products now include an additional size 0, expanding the standard sizing range.

## New PRO and ELITE Jerseys

We've comprehensively updated nearly all PRO and ELITE jerseys for 2026. These enhancements include the use of newly developed, technical fabrics that improve comfort and moisture management. A highlight of this collection is the brand-new PROJECT Verano jersey, developed in collaboration with Vorteq to deliver maximum aerodynamic efficiency for racing in hot conditions.

Additionally, all updated short sleeve PRO jerseys now feature our LoadLock Pocket system, which prevents sagging and preserves a sleek, performance-ready silhouette—even when the pockets are fully loaded.

## ELITE Bibs – Updated Back Mesh Construction

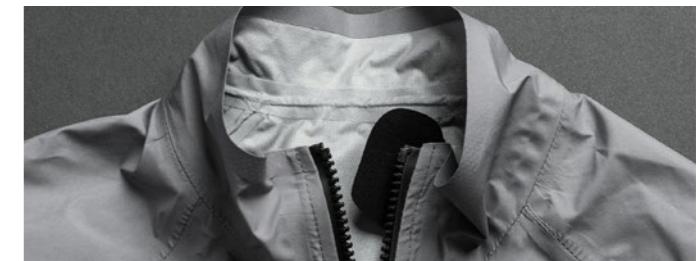

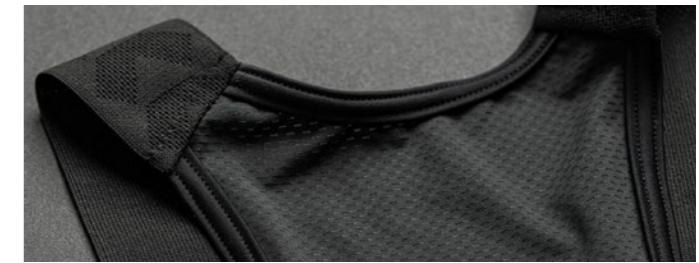

All ELITE bib shorts and bib tights with braces now feature a new back mesh construction designed to enhance comfort, breathability, and fit.

The updated mesh is lighter, softer, and more breathable, improving next-to-skin comfort while also giving the bibs a cleaner, more modern technical look.

## New PRO eVent Jacket

Designed for racing and training in extreme wet and windy conditions, the new PRO eVent jacket offers full waterproof and windproof protection without sacrificing breathability.

Thanks to its ultra-lightweight woven membrane fabric, fully taped seams, and refined ergonomic cut, this jacket ensures high performance, comfort, and durability in even the harshest environments.

*We are thrilled to present these advancements to you and hope they elevate your cycling experience.*

*Thank you for choosing Kalas.*

**František Klouček**

AERO TIGHT FIT SUMMER

# Project RR

## PROJECT

- Patented technology to improve aerodynamics.
- Tests proved drag reduced by more than 5% compared to our Brios RR suit (results change for different body shape and position).
- An opening between the upper and lower parts for easier comfort breaks.
- Option to have no pockets, or integrated back number pocket which removes the need for pins and improves your aerodynamics, saving time and prolonging the life of the suit.
- Leg ends finished with bonded hem.
- Option to have an integrated radio pocket.

AERO TIGHT FIT HOT SUMMER

# Project Verano

PROJECT

- All the same features and benefits of the Project RR 1.0 skinsuit, except designed for racing in extremely hot conditions.
- Wind tunnel test data suggest aerodynamic performance is very close to that of the Project RR 1.0.
- Also recommended for use in MTB races.
- Option to have an integrated radio pocket.

# PADS

Choosing the most appropriate pad or 'chamois' to best suit your body type and kind of riding can make a huge difference to comfort and performance.

All our pads are supplied by industry leading Italian manufacturer Elastic Interface.

PADS

2026 KALAS

Find more details about pad options online:

## Endurance 3D

The Endurance 3D pad has been created in a close collaboration with the performance specialist of cycling pads Elastic Interface. It is an ideal choice for those who are looking for an unequalled performing pad designed for long-distance riding.

### Important features:

- 3D anatomic shape achieved thanks to two half-moon components for enhanced fit.
- Special frontal top features additional perforation to allow best air permeability.
- Perforated layer for enhanced air flow and ventilation throughout the whole chamois.
- Ultrahigh density inserts of 200 kg/m<sup>3</sup> specifically shaped and designed to cushion main pressure points.
- EIT CARBONIUM FLASH material has special channelled structure for enhanced air flow and ventilation.
- 80 density 6mm thick insert purposely located in the front area for improved flexibility.

## Endurance 3D Women

The Endurance 3D pad has been created in close collaboration with the performance specialist of cycling pads Elastic Interface. It is an ideal choice for those who are looking for an unequalled performing pad designed for long-distance riding.

### Important features:

- Wide central area with extra density, specifically shaped to fit female anatomy.
- 3D anatomic shape achieved thanks to three components joined together for enhanced fit.
- Perforated layer for enhanced air flow and ventilation throughout the whole chamois.
- Ultrahigh density inserts of 200 kg/m<sup>3</sup> specifically shaped and designed to cushion main pressure points.
- EIT CARBONIUM FLASH material has special channelled structure for enhanced air flow and ventilation.

## Zoom X

Multilevel elastic pad of the ELASTIC INTERFACE TECHNOLOGY® series made in an attractive design and developed to provide a great degree of protection and comfort.

### Important features:

- Elastic material from microfiber and polyester fibres for maximum breathability.
- Dual density construction guarantees a great degree of protection and comfort.
- Bacteriostatic material.
- Extremely soft side wings providing freedom of movement and excellent fit.
- Perforated foam ensuring increased ventilation and quick dry.
- Specially designed perineal area to preserve blood circulation and to protect the sciatic nerve.

## Zoom X Women

Multilevel elastic pad of the ELASTIC INTERFACE TECHNOLOGY® series made in an attractive design and developed to provide a great degree of protection and comfort.

### Important features:

- Elastic material from microfiber and polyester fibres for maximum breathability.
- Dual density construction guarantees a great degree of protection and comfort.
- Bacteriostatic material.
- Extremely soft side wings providing freedom of movement and excellent fit.
- Perforated foam ensuring increased ventilation and quick dry.
